

Crater lake Science Learning Center Soundscape project

Special Thanks
To a
Wonderful

Mr. Paul
Bosley

We were very
privileged to get
to know you and
have you here at
our school! We wish
you the best of
luck in all you do!

~Garden~

Our school garden is growing! Mrs. Marla and the SMILE Club had a great time laying down mulch and preparing the soil mixture. Thanks to Scott Girdner, each class has some frames to plant and Thanks to Will McAuliffe; we can keep some of the critters out with the fence. Mrs. Collins & Mrs. Stephanie's classes planted flowers for their butterflies. It was magical to see the butterflies alight on students noses and drink from the flowers. A Garden Club met several Thursdays to plant flowers & Vegetables (lettuce, broccoli, onions, garlic, peas, and radishes). We expect to harvest some things this summer, but as we saw this past fall, there was plenty to harvest in the autumn. At harvest, classes applied a variety of skills (math, art, and writing) and they were able to enjoy healthy snacks. If you would like to work in the garden over summer give Ms Sandra a call at school and she will arrange a day!

Cow Creek Umpqua Indian Foundation recently awarded \$4,900 to Sage Community School for purchasing a greenhouse! We look forward to an extended timeframe for projects.

Teachers

Mrs. Vincent – 2nd & 3rd

Throughout the year we focused on Growth. In the fall, they harvested garden and applied math & measurement and writing skills, they studied the growth of America, growth of Oregon. Through reading, writing, math and art projects they explored Oregon geography & agriculture, exploration of space. Working with the fourth and fifth graders we learned the use of GPS in a fund project led by Chris Wayne. Together the class had some great experiences in learning and applying skills. The second and third graders were diligent, working very hard this year to improve and show success in basic skills as well as character.

Mrs. Marla – 6th & 7th

This year we were able to meet with an on-line high school near Eugene, West Linn Tech. it has national approved program for mechanics and students in the junior and senior year get to take free classes from Lane Community College, coming out of high school as certified mechanics. One their programs is building electric vehicles, and students in their freshmen & sophomore year are able to participate in the project, with the end of the year goal of racing the vehicle in national recognized races within the pacific Northwest. We also were able to go behind the scenes once again, at the wildlife safari, cleaning & feeding the giraffes.

We all can be very proud of both the 6th & 7th grade, as all brought up their math and science scores this year, with the 7th grade showing marked improvement. We had several students who exceeded in both the reading and math state tests

Mrs. Marla's Class

Soccer

In the Chiloquin city Park
FREE, FREE, FREE

- ❖ When: Friday, July 30,2010 & Friday, August 27,2010
- ❖ Time: 10am to 12:pm
- ❖ Ages 3-12 **A PARENT OR ADULT MUST BE PRESENT!**
Come learn to play soccer and have lots of fun!

To sign up or get information about a fall soccer league,
Call Kelly Kritzer at (541)783-2953
